XL® or
Berkley®
Trilene® XT®

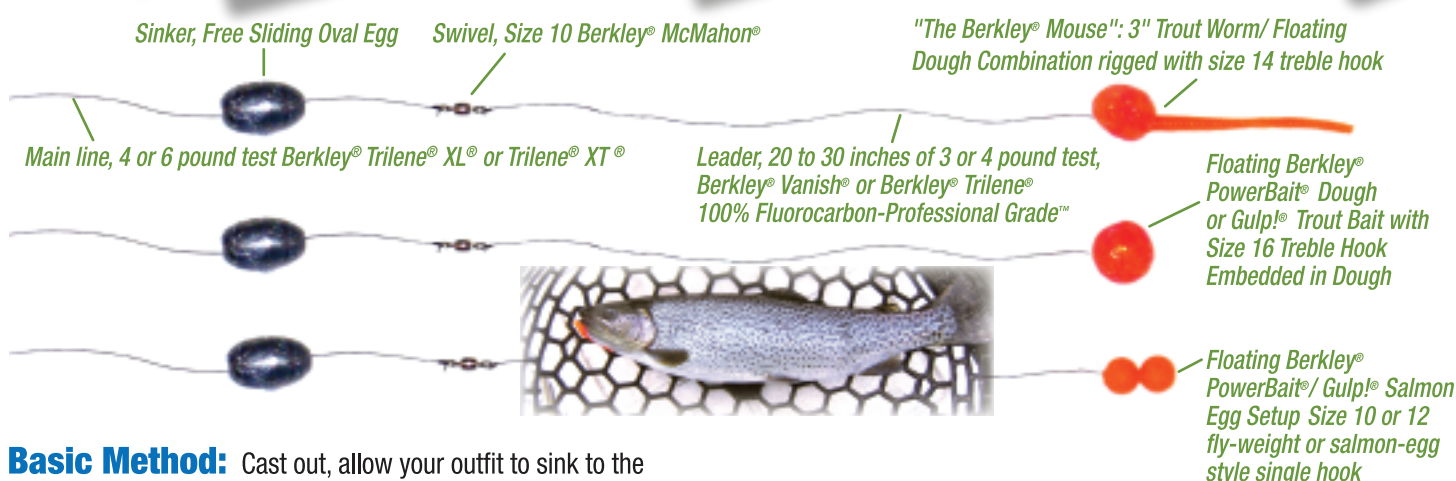

LEADER:

Berkley® Vanish®
Fluorocarbon,
Berkley® Trilene®
100% Fluorocarbon-
Professional Grade™ (best)

BAIT:

Floating Berkley® PowerBait®
Dough/Nuggets, ALL-NEW
Gulp!® Trout Dough,
Gulp!® Floating
Berkley® Salmon
Eggs® or Power® Eggs

Basic Method: Cast out, allow your outfit to sink to the bottom, wait for a bite, set the hook when your rod tip dips toward the water. And; leave some slack in your line, so trout can swim off with your bait and swallowing it without feeling line resistance.

Important! When using Berkley® Floating PowerBait® Dough or all-new Gulp!® Trout Bait, you can greatly increase your success by using enough dough Trout Bait to float your hook off the bottom so cruising trout can see/ find it. Start with a "marble" size bait molded around a size 16 treble hook. Before casting, check that you have enough bait to float your hook!

Tip: Short leader, 12 to 18 inches when trout are hugging the bottom, which might be during bright, sunny conditions or when surface water temperatures begin to warm. Exception: Try a leader as short as 6" when trout are spawning and you are using Berkley® PowerBait® or Gulp!® flavored Salmon Eggs or Roe/Egg Clusters. Longer leader, 30" to 40", when trout are cruising higher in the water column, which might be early in the season (when water temperatures are cool), early or late in the day, or on overcast days. You can freshen/ juice-up your baits by dipping them in Berkley® PowerBait® Trout Dip or spray with Berkley® Gulp!® Alive!® Spray.
